Get Started

Welcome to the HYTOPIA Developer Documentation!

HYTOPIA is a modern games platform inspired by Minecraft, Roblox, and Rec Room.

With HYTOPIA you can create your own link-sharable, massively multiplayer games in a voxel-like style by writing TypeScript or JavaScript. All playable in a web browser on any device, natively on PC/Mac/Linux, on Android/iOS phones and tablets, and even as a Discord Activity with friends!

Anything is possible, there are no boundaries, with HYTOPIA your imagination is the limit!

A block dodging game built from scratch in 2 hours with the HYTOPIA SDK.

Let's Dive In...
